Accelerating
AI Adoption

Welcome to the CeADAR Membership Programme

CeADAR membership helps companies of all sizes with their AI journey. We support companies to learn, experiment, develop and innovate with AI, while being part of a like minded network of innovative companies and organisations.

Our aim as a national centre is to help Irish businesses to be more innovative, productive and competitive, harnessing the power of the latest AI tools and approaches, while at the same time being compliant with EU law and developing applications that maintain trust with customers and other stakeholders.

To enable this, we have put together a wide offering to allow members to explore the benefits of AI and to access CeADAR's expertise, learning platforms, compute platforms, funding opportunities, and networking events.

We welcome you to join us on the journey and to help shape not only your own AI future but that of Ireland as well.
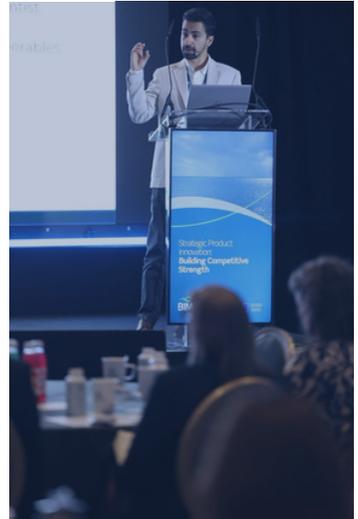

John Lonsdale

AI Resources

Work Ready Graduate Placement

The Work Ready Graduate Placement is part-funded by Enterprise Ireland and sees data scientist graduates placed in a host company for 12 months to support AI related projects. The graduates also take part in a structured training programme delivered by CeADAR. Each placement has a dedicated CeADAR Data Scientist mentor to advise and support both the graduate and the company.

Our qualifying member companies receive priority access to the placement programme.

Connect Placement

The Connect Placement programme enables a CeADAR data scientist to work as an active contributor of a member company project team for a flexible period of time (3, 6 or 12 months). The member company also has access to advice and support from a senior data scientist throughout the engagement.

The Connect Placement is only open to our member companies and is funded by the member company.

AI Knowledge Transfer

TechTalks

TechTalks are webinars focusing on cutting edge technical topics from leading AI experts and data scientist from industry and academia. The webinars are available to all and are of particular interest to members of the team with a technical and data science background. Member companies receive a summary document of key takeaways after each webinar.

AI Workshops

Member companies can request a 3 hour workshop to explore how AI can be implemented to deliver enhanced productivity and identify where AI can improve products and services within the organisation.

Lighthouse Project

The Lighthouse Project is designed to guide industries through cutting edge AI technologies in an applied AI research environment. Member companies receive in-depth whitepapers on Lighthouse research.

AI Industry Networking

Annual Conference

Hosted in Dublin, we invite a broad range of speakers from AI data scientists, government bodies, member companies and industry experts. The event is a platform to show the capabilities of the centre and highlight the achievements of our member companies through opportunities to present case studies and join panel discussion on AI related business topics.

Business Beacons

We host breakfast seminars and panel discussions throughout the year to bring our membership together to understand and progress AI and business challenges.

Previous Business Beacon topics have included AI Recruitment, AI and the EU AI Act, AI and Cybersecurity.

AI Member Awards

Each year we select member companies who have successfully implemented AI to improve their processes, services or products and who deserve particular recognition for their achievements.

AI Funding Bureau

Funding Workshop

CeADAR has extensive knowledge of the funding opportunities available in Ireland and throughout Europe for the development and implementation of AI.

We have successfully supported our member companies to secure finance to aid the delivery of their AI projects. Members companies can request a half day workshop where we identify suitable funding opportunities and support you in completing funding applications.

Funding Summary

We update our member companies of all current and available funding mechanism and opportunities within Ireland that can be used to support AI initiatives.

Partnership Sourcing

Through our ecosystem we can also identify the right partners to support the delivery of our members AI consortia projects.
